

Leadership For Women™

All individuals within an organization take on significance as they represent the organization to the outside world and as they interact within the organization. Their personal motivation and self-image are key to how they perform, respond, and lead. There is no better time to focus on women and the remarkable strides they have made in the last century and continue to make. The 21st century does indeed belong to women! Women will make more progress using their full potential in the next 50 years than they have in the last 500 years.

LMI's Leadership For Women™ program helps women: Realize their potential for personal leadership through building on strengths and improving self-image; Develop the critical attitudes, self-confidence and qualities that meet the demands of modern business; Increase self-motivation by altering attitudes, behaviors, and habits; Examine organization's culture and how it impact success; Align leadership skills with organizational culture; Make choices and trade-offs necessary to attain, regain, or maintain work-life balance; Develop a written and specific Plan of Action for success.
